

EARLYPOLY OBS_207_EN

Author's name and institution: **Edith Debrenti**, Partium Christian University, Oradea, Romania

Formal and/or non-formal educational setting: **Both**

Most relevant age group: **3-8 years old**

Description of the idea / problem / exercise: **Find the duplicate!**

The child should find which element appears twice in the shape by observing and comparing the elements.

- *Why this exercise is good:* It develops observational skills, attention to small details, and memory. In addition, children enjoy themselves during the game and learn actively.
- *Has anyone tried this? If yes, when and where?:*
- *Notes:* The game can continue by doubling a different element and, in the same way, finding the element that appears twice.
